

**A RESEARCH & HIGHER
EDUCATION SECTOR
ARCHITECTURE**

**HOSA: The Dutch framework for
digital sector facilities
of the future**

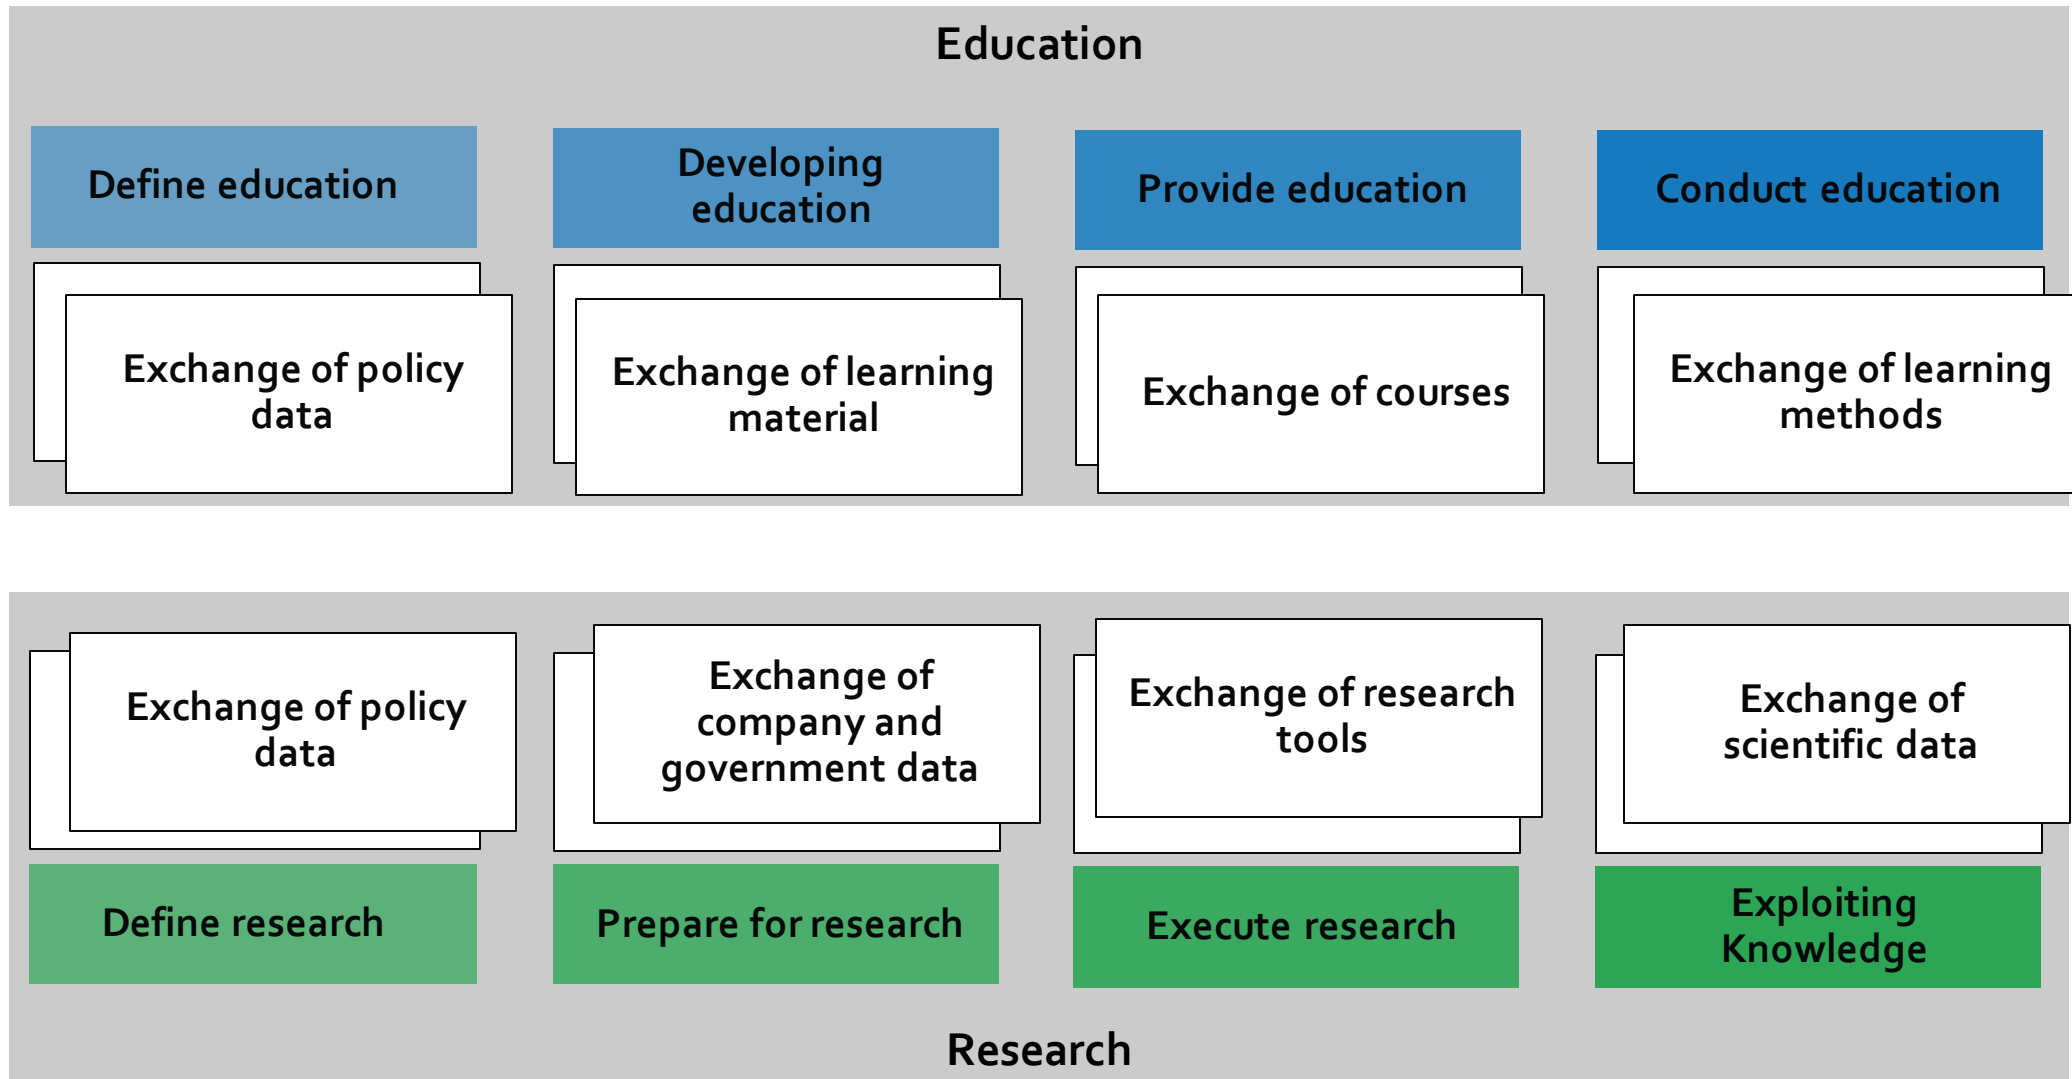

HOSA: National framework for future sector facilities

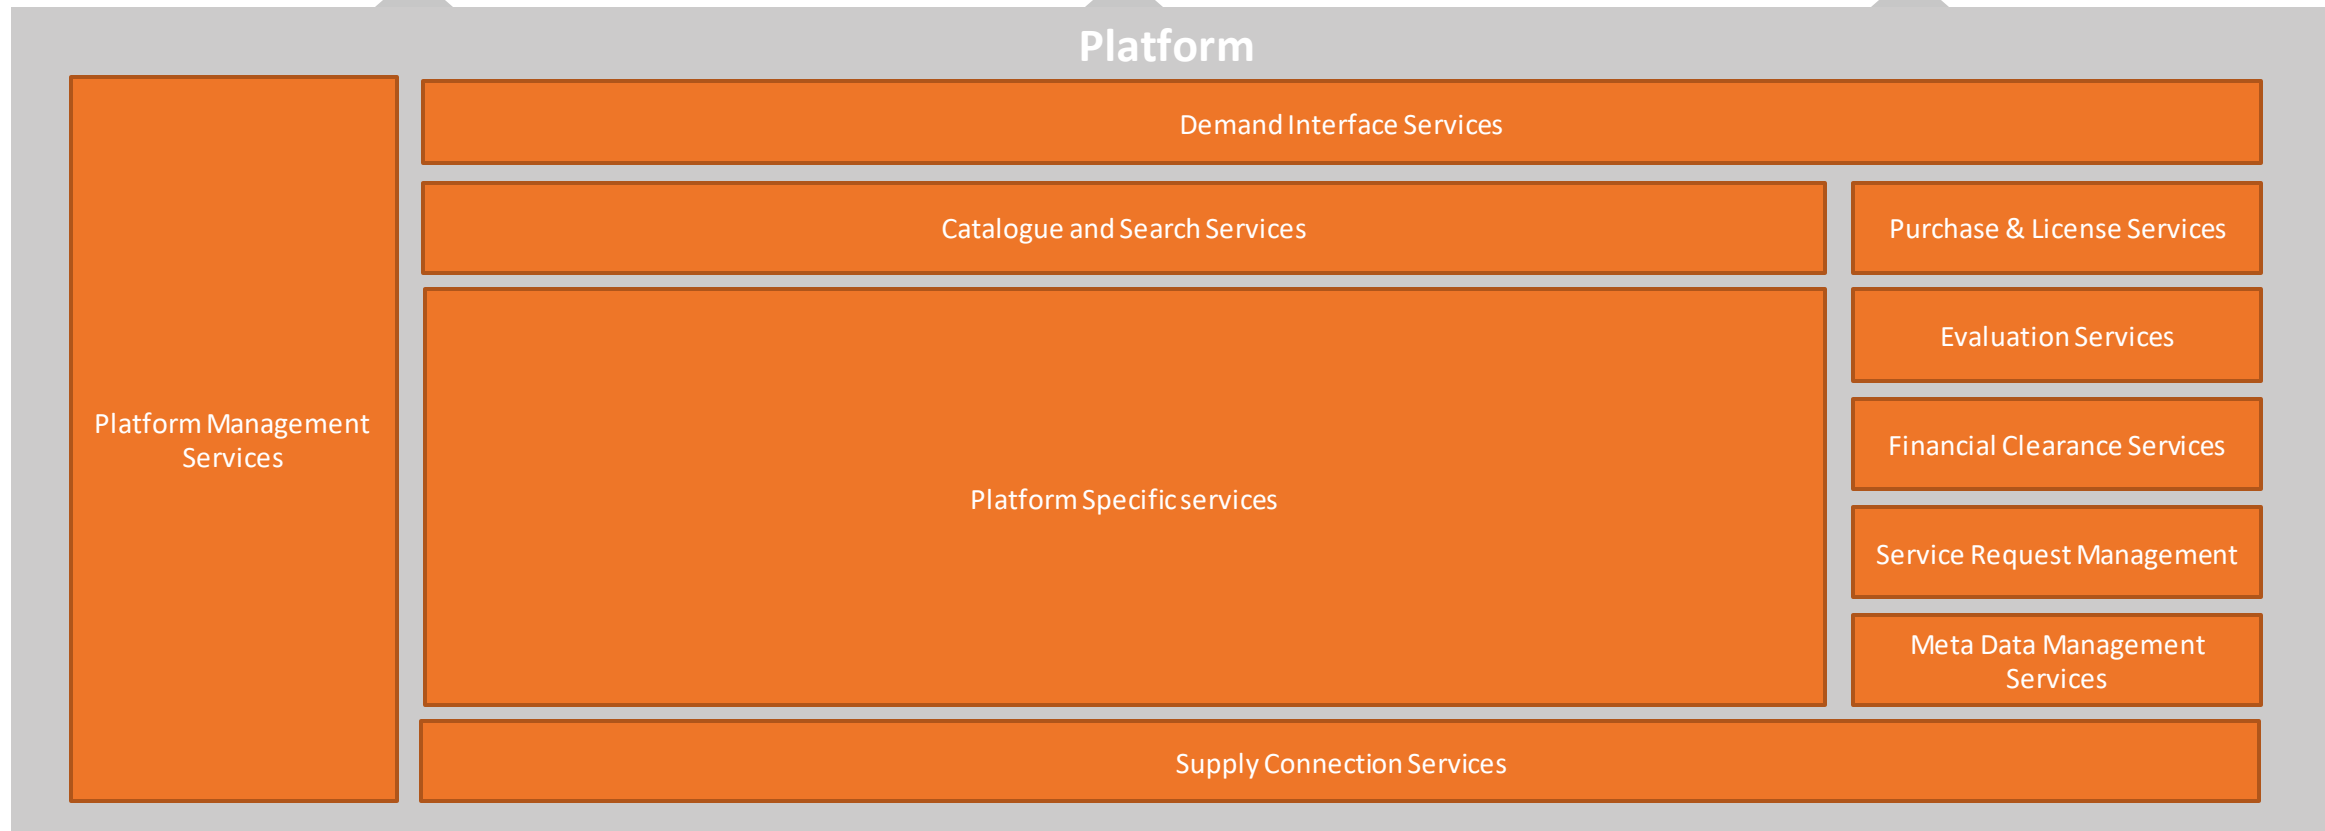

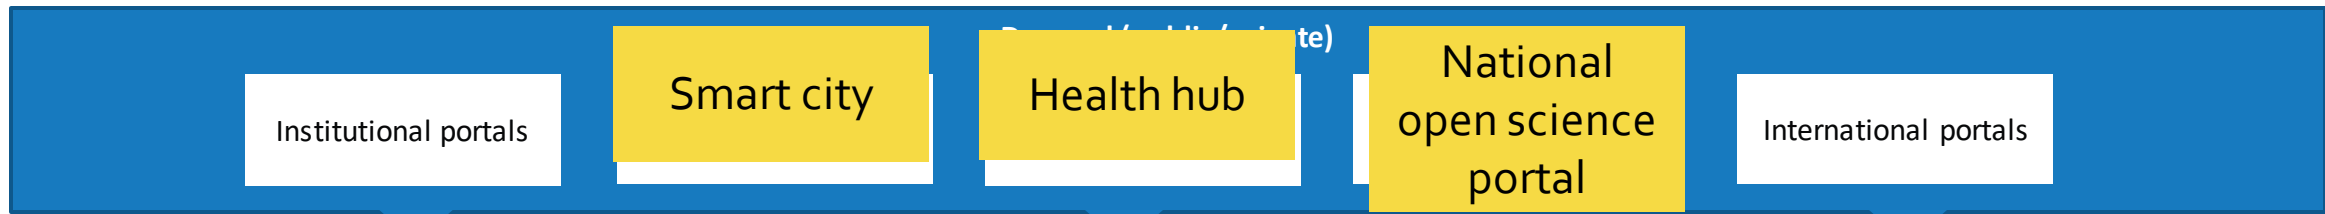

A highlevel architecture/ destination plan:

- Future-proof architecture by focusing on sector aims
- Collaboration as central goal
- Coherence and interoperability through equal use of models and principles
- Public values are central

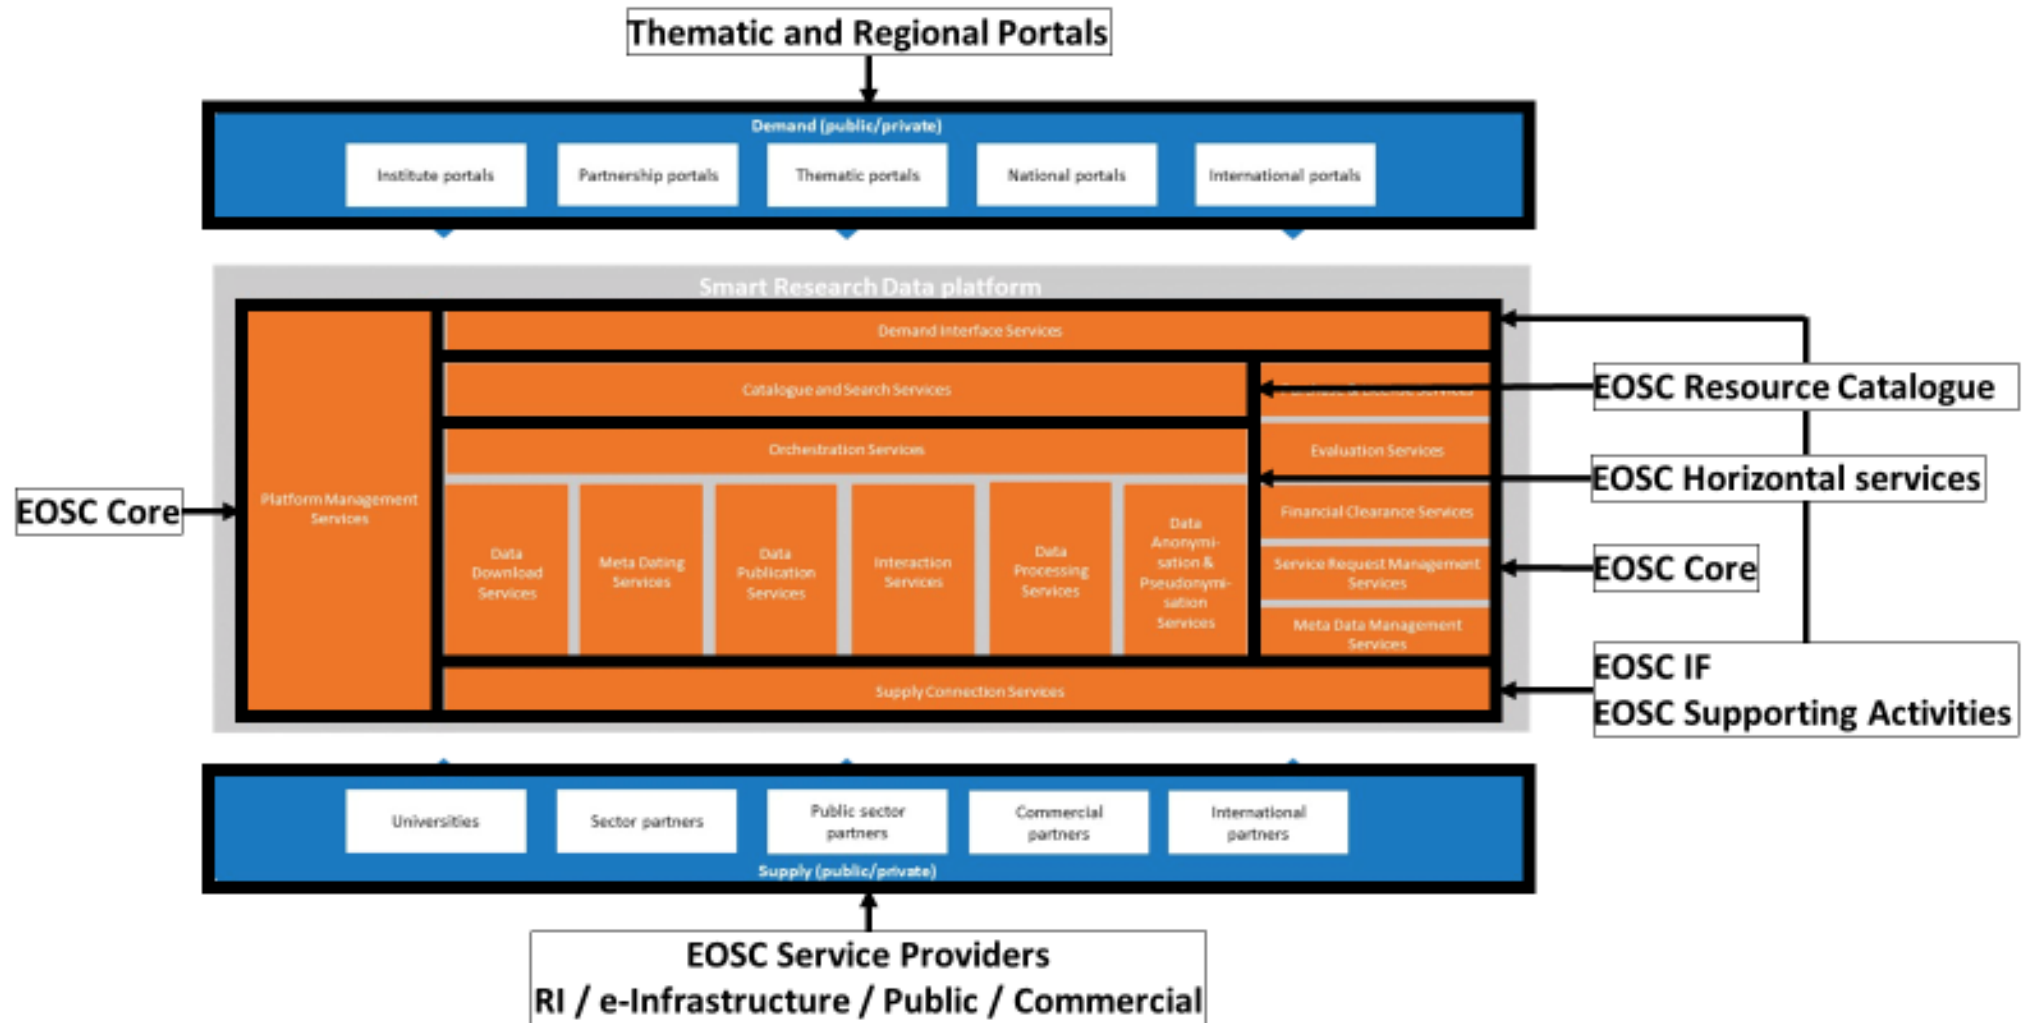

Marketplaces will be everywhere in future

Comparison HOSA versus EOSC

Challenges

- Can we develop a common core for the national marketplaces?
- Can we define/build marketplace components that can be used on a national and international level?
- Can we define digital services that are usable on national level (within HOSA) and international level (EOOSC)
