

Using the EOSC Portal: **LIBRARIES**

Libraries are a vital support for researchers when it comes to navigating access to research publications, data and services. The European Open Science Cloud (EOSC) Portal helps researchers find and access these outputs as well as services.

Here are some ways to engage with the EOSC Portal

HELP YOUR RESEARCHERS SEARCH FOR RESOURCES

Discover discipline-specific research outputs and services

Access and **reuse** Open Science training resources

Find out how to use the **EOSC Portal** – a search engine for the cross-discovery of publications, data, software, grey literature and other research, services and **training resources**

MAKE YOUR REPOSITORY AND INSTITUTIONAL SERVICES VISIBLE

Register your repository or service as a **Data Source** so it can be harvested

Make your repository or service available to users from other institutions and countries

Want to make your repository content & resources available to a wider audience?
Check the eligibility criteria for becoming an EOSC provider on the **EOSC Providers Hub**

POINT YOUR RESEARCHERS TO THE FOLLOWING SERVICES

User dashboard

The **EOSC Portal's user dashboard** feature allows authenticated users to define a **user profile** that will allow the EOSC Portal to suggest new resources of interest. Users can add projects with multiple users, bookmarks for favourite resources, and more. Communication with EOSC experts, alerts and other urgent updates can also be managed through the dashboard

Facilities for data analysis

Help researchers access facilities for computation and analysis (e.g. facilities that their host organisation might not have)

EOSC Authentication & Authorization Infrastructure (EOSC AAI)

Librarians can sign into EOSC services using the AAI, and researchers can sign in using institutional and personal credentials

Accounting

Receive feedback on how research outputs from institutional repositories are viewed and downloaded with EOSC Accounting features

Monitoring

Track the reliability of library services registered on the EOSC Portal with the EOSC Monitoring service

www.eoscfuture.eu

Whether as a research support, user or resource provider, start engaging with EOSC...

EXPLORE

Help researchers find cross-disciplinary resources, software, data and services via the **EOSC Portal**. Show researchers how to link resources and people and get access to data-related services.

REGISTER

Register* your repository as a Data Source on the **EOSC Portal**.

*To make your resources available on EOSC, your institution must be registered as an EOSC provider. A registered EOSC provider can register several resources using the same institutional identity.

EXPOSE

Your library repository metadata records will become automatically available and visible via the **EOSC Portal**.

TRACK

Review content views and downloads from your repository and track the reliability of your services.
